

Bearing seminars

Especially for the attendees of the BearingNet User Meeting
In Berlin on 10th and 11th of March 2020

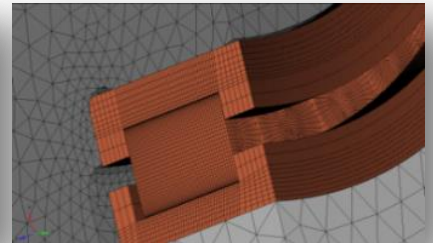

Basics of bearing technology

- 10th of March 2020, 10:00 am – 05:00 pm

This seminar provides basic knowledge with an emphasis on bearing arrangements and quality assurance during purchasing. Primary topics are:

1. Types, Properties, Concepts
2. Basics of Tribology
3. Raceway crowning
4. Material properties
5. Sample assessment

Development of bearing suppliers and quality control during purchasing

- 11th of March 2020, 10:00 am – 05:00 pm

Global sourcing of bearings opens plenty of opportunities for optimization of supply chains. However, any new supplier approval goes along with a certain quality risk. Therefore, this seminar is focused on the following subjects:

1. Definition of quality requirements, technical specifications
2. Approach during supplier visits and audits
3. Requirements related to documentation of production
4. Methods for incoming inspection
5. Concepts for quality control
